PROJECTS & TRAININGS:

- **Udacity Nanodegree: Full Stack Web Development (Sem 6th)(January)**
  I learnt how to build complex server-side web applications that use powerful relational databases to persistently store data. Also, learnt to build applications that can support any front-end, and scale to support hundreds of thousands of users.
- **Project made: AutoComplete (Sem 4th)(April)**
  A widget which provides suggestions while you type into the field. To take the given word and generate all words which are 1 distance (1 edit or 1 delete or 1 replace) away and one by one look them in dictionary.
  If nothing found, then look for all words which are 2 distant and so on.
  Technologies Used: HTML/CSS, Javascript, php; OS: Windows
- **Project made: Fresh_Tomatoes (Jan, 2017)**
  A website that displays movie-trailers. This is a server-side code to store a list of your own favorite movies, including box art imagery and a movie trailer URL. This code is then used to generate a static web page allowing visitors to browse their movies and watch the trailers.
  Technologies Used: HTML/CSS, Javascript, python; OS: Linux
